

Grind Master Forms Technical Collaboration with Roberts Sinto America

Grind Master is excited to announce they have entered a partnership with Roberts Sinto Corporation USA to offer additional grinding solutions to North American Foundry customers. RSC will design, manufacture and service GRINDMASTER ROBOFINISH products for grinding room applications in North America.

“We have indigenously developed the ROBOFINISH Technology over 10 years and have been very successful in both Ferrous and Non-Ferrous castings in the Indian Foundry, with some projects internationally. The collaboration with Roberts Sinto Corporation will enable the ROBOFINISH products to impact the Foundry industry in the Americas. Robotic Grinding/Deflashing brings a transformation in the Foundry bringing Quality, productivity and safety to the cleaning room” says Sameer Kelkar, CEO and R&D Head at Grind Master.

“This collaboration reflects RSC’s desire to collaborate with companies that share the same vision of moving manufacturing to the next level and we are excited to see the impact it will have on RSC, GM and our customers,” says Michael Halsband, President - Roberts Sinto Corporation.

RSC is known for engineering and manufacturing various types of innovative blast, automation and foundry equipment including grinding solutions. The GM product line of robotic grinding machines further expands this line up by adding the unique ROBOFINISH technology to grind complex castings.

GRINDMASTER is a known name in surface finishing - providing turn-key solutions of specialized machinery, including micofinishing, metalfinishing and deburring. GRINDMASTER has developed ROBOFINISH Robotic machines for Grinding/Fettling/Deflashing and Finishing Ferrous and Non-Ferrous Castings with Complex Geometries with enhanced performance, quality and quick ROI
